

Building Stronger Ecosystem Connections in the New Nordics

Sweden is renowned for its entrepreneurial spirit, forward-thinking policies, and thriving tech landscape. Our goal is to explore the key factors driving Sweden's successful startup ecosystem — from supportive government and R&D initiatives to dynamic innovation hubs.

As part of the **New Nordic Deep Tech Valley** initiative, we aim to foster connections, explore partnership opportunities, and gain valuable insights into best practices. By bridging our ecosystems, exchanging knowledge, and identifying ways to collaborate, we can strengthen the attractiveness and competitiveness of the entire Nordic-Baltic region.

Our focus lies in sparking a **mindset and skillset shift**, creating a **toolset for innovation**, and driving **systemic change**. Specifically, we are concentrating on the development of the **healthtech, defencetech, cleantech, and AI sectors**.

The delegation includes representatives from SPARKUP Tartu Science Park, Tallinn Science Park TEHNOPOOL, the University of Tartu, UniTartu Ventures, Creative Destruction Lab, Tallinn University of Technology, Civitta Estonia, TGS Baltics, sTARTUp Day festival, Beamline Accelerator, New Nordics AI, Startup Estonia, and Enterprise Estonia.

Meet us:

- + November 5th at 16-18 reception with Honorary Consul Karl Malmström, Veras gräsmatta, Stena Center Läraregatan 3, 411 33 Gothenburg
- + November 6th at 16-19 reception at Embassy of Estonia, Tyrgatan 3, 114 27 Stockholm

Contacts:

- + Inga Kõue, DeepTech Sector Project Lead
inga.koue@startupestonia.ee
- + Kati Pärn, Nordic Partnerships Lead
kati.parn@startupestonia.ee

Startup Estonia is a governmental initiative under Enterprise Estonia with a mission to design a future-proof startup ecosystem — to improve connections, data, and tools.
